Code Search Engine - Supplementary Specifications

Robert Wenger, Arman Bahraini, Marcus Stewart

Non-functional requirement 1: Be a web app

The system must be accessible via a browser.

Non-functional requirement 2: Return results in a timely manner

The system must return results within a reasonable time when accounting for the size of the repository to search.

Non-functional requirement 3: Simple/Easy to use

The system should be straightforward, it should not require instructions in order to use it, and it should not offer too many options that could be confusing to the user.

Non-functional requirement 4: Visually appealing

The system must be visually appealing while not distracting the user from perusing the results of a search.
